• Resolve Development Requirements

• Control Granularity with ease

• Aim for Simpler Infrastructures (ex. people, networks, pipelines, ....)

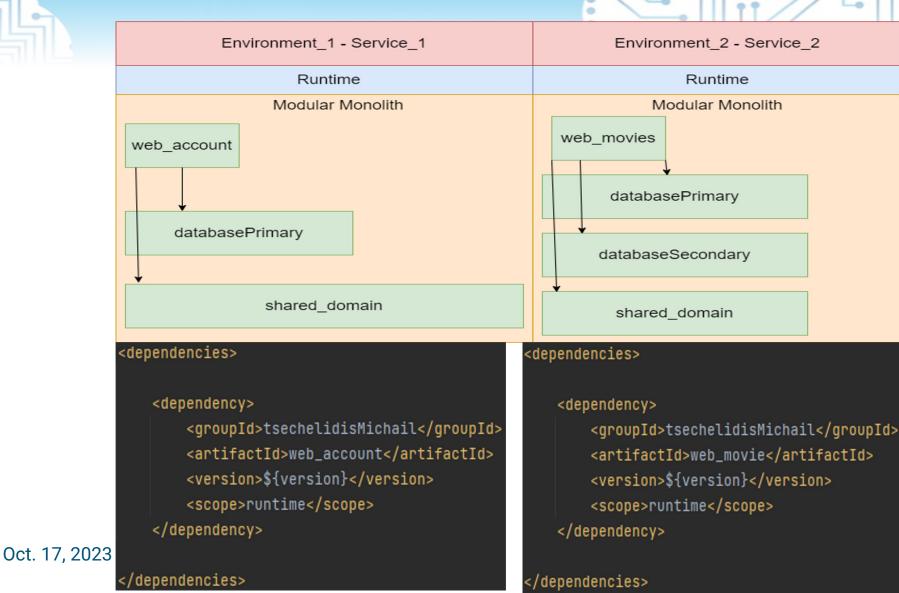

Ludwigsburg, Germany

• Simple starting point

• Easy identification & extraction of internal functionalities (ex. port.out package structure)

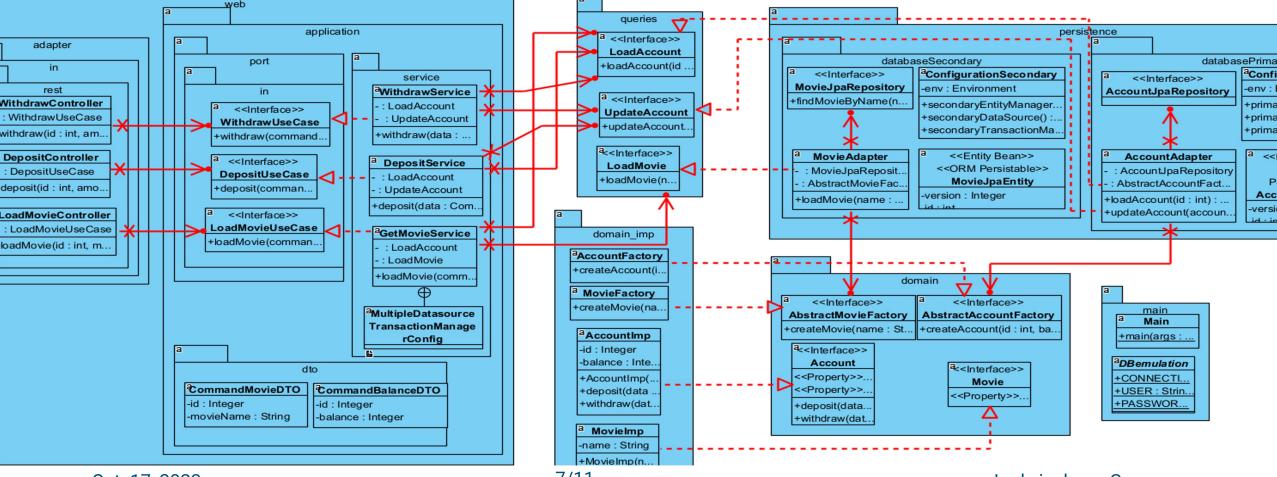

- Dependency Injection
- Separated Interfaces
- Layer Supertype
- Abstract Factory

## Larger systems have more Development Requirements

- Git Branches
- Pipelines (ex. Github Actions)
- Artifact Repository (ex. Github Packages)

### 23 on Cloud to Edge Continuum

I need to learn a lot of things before I could get going with this architecture.

> I will feel very confident using the architecture.

0/5 Strongly Agree

1/5 Agree

I found the architecture very cumbersome to use.						
I would imagine that most people would learn to use this architecture very quickly.						
I thought there was too much inconsistency in this architecture.						
I found the components in this architecture were well integrated.						
I think that I would need a lot of support to be able to use this architecture.						
I think the architecture will be easy to use.	•					
I found the architecture unnecessarily complex.						
I think that I would like to use this architecture frequently		- /	_		_
